## X-RAY OF THE RIGHT KNEE

### Indication:

Fall injury, pain.

### Technical Factors:

Two views of the right knee were obtained.

### Findings:

There is question of small nondisplaced fracture at the inferior patella. There is no dislocation or other fracture appreciated. Epiphyseal plates and joint spaces appeared to be well maintained. There is no bone erosion or abnormal calcium deposit. There does appear to be small joint effusion. Remainder of the examination is unremarkable.

### Impression:

1. Appearance of small joint effusion with question of nondisplaced small fracture at the inferior patella.

We thank you for the courtesy of this referral and look forward to being of service to you in the future.
